

Installation instructions for Merika® build-up ring Merika no. 412

- **Size:** 150 × 160
- **Weight/kg:** 0,402
- **HVAC no:** 3318117
- For vinyl floor and tile installation
- For wooden and concrete floors
- The delivery includes 3 screws

**Practical screw fastening
to a floor drain**

Note! The build-up ring must be cut straight.

The build-up ring is lubricated with a lubricant and pressed to its place.

Note in the installation that the screws of the build-up ring (3 pcs) are screwed to their places but **not tightened**. The screws do not need to be tightened as the sealing is in the over sheath of the build-up ring/floor drain. Tightening the screws will deform the floor drain/build-up ring.

Accessories:

M-412 Build-up ring, HVAC no: 3318117

Spare parts:

M-202_03 Lip seal for a floor drain, new 160
